

The campus at Kirkpatrick Elementary has a completely new look since the school became the official magnet school for Health and Medical Sciences. The hallways are lined with colorful graphics covering health, physical activities and nutrition and the staff can be seen in scrubs on special days!

Project Fit equipment has been installed in front of the school and is available for use by the community during non school hours. A raised garden project offers students a chance to learn where vegetables really come from and how good they can taste. The cafeteria staff made a big hit recently when they started offering Chef's Salad to staff and 5th-6th grade students.

Principal Suzanne Walton and Health Class students are pictured below receiving an award from the Coahoma County Community Health Council recognizing them as November HEALTH CHAMPIONS.
